

Screen mats

Unique and versatile.

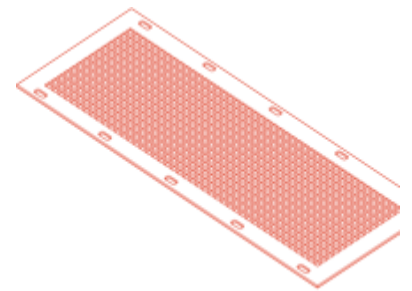

Unique and versatile

We supply screen mats made of Küprene, GK-Soft, Vulkollan® and Gigant. They are punched or moulded, depending on their intended use, and are available in rubber with or without fabric reinforcements. Screen mats are used in flip-flop screening jigs in the recycling and wood industries, quarries and for dry screening in gravel plants.

Functions

- Produced for specific applications, either punched or moulded
- Available in all Küper materials, including Vulkollan
- Available as a rubber mat with and without fabric reinforcement
- Used in the recycling and wood industries, quarries and gravel plants

Technology

Materials

Gigant

Moulded vulcanised rubber with a hardness of approx. 60 Shore A. Very abrasion resistant and elastic.

GK Soft

Polyurethane in various hardnesses up to 85 Shore A. Wear resistant and elastic.

Küprene

Wear-resistant polyurethane with a hardness of 90 Shore A. Elastic and impact resistant. Resistant to water and many chemicals.

Vulkollan

Polyurethane with a maximum hardness of 70 Shore A. Wear-resistant and impact-resilient.

Good resistance to oil, grease, petrol and various solvents.
